

Are you able to bid if I give you all 4 hands

ChatGPT

Yes, I can help you analyze and suggest bids based on the provided hands of all four players. Please provide me with the four hands, indicating the cards held by each player. It would be helpful if you could specify the players' positions (North, South, East, West) and any relevant information about the bidding system or any previous bidding that has occurred. With that information, I can assist you in analyzing the hands and making bidding recommendations.
